GRANT DETAILS:

Salt Lake City has received funding for methamphetamine enforcement three times during the past eight years. We have witnessed success in fighting meth through multi-agency partnerships, training and a public awareness campaign. We will continue to foster the multi-agency partnership and joint response approach to the methamphetamine epidemic in Salt Lake City and the surrounding areas. We will link with local, state, and federal initiatives to complement the work of the SL Meth Initiative. In an effort to increase public awareness and training about meth and other dangerous drug activity, we are expanding our public awareness campaign, purchasing investigative supplies and equipment, and overtime for special enforcement projects. This grant application was submitted in tandem with the BJA Meth Grant we submitted last month.
