SALT LAKE CITY COUNCIL STAFF REPORT BUDGET ANALYSIS – FISCAL YEAR 2009-10

DATE: April 24, 2009

SUBJECT: PUBLIC UTILITIES DEPARTMENT

Water, Sewer, Storm Water Funds

STAFF REPORT BY: Lehua Weaver

CC: David Everitt, Jeff Niermeyer, Tom Ward, Jim Lewis, Gordon

Hoskins, Gina Chamness, Randy Hillier

The Department of Public Utilities has prepared a budget for the Council's review, which includes a combined Operating Expenses and Capital Outlay budget of \$108,358,748 for the water, sewer and storm water funds. It was originally planned that a proposal would accompany the annual budget to restructure the water rates. However, the Department will continue to finalize and research the impact of possible changes, and a recommendation will be submitted over the next year.

Public Utilities Department 2009-10							
Water, Sewer, Storm Water Budgets							
	Amended	Proposed					
	2008-09	2009-10	Difference	% Change			
Revenue & other sources							
Services Revenue	\$ 71,977,000	\$ 71,802,000	\$ (175,000)	-0.2%			
Interest Income	1,000,000	770,000	(230,000)	-23.0%			
Impact Fees	1,050,000	1,050,000	-	0.0%			
Use of cash reserves	27,666,341	30,136,298	2,469,957	8.9%			
Other Various Revenue							
Sources	4,541,000	4,600,450	59,450	1.3%			
Total revenue & other							
sources	\$106,234,341	\$108,358,748	\$2,124,407	2.0%			
Expenses							
Salaries, wages & benefits	\$ 24,896,265	\$ 24,855,469	\$ (40,796)	-0.2%			
Materials & supplies	3,741,080	4,036,505	295,425	7.9%			
Charges for services	29,311,696	29,922,214	610,518	2.1%			
Total operating expenses	\$ 57,949,041	\$ 58,814,188	\$ 865,147	1.5%			
Capital improvement	35,686,900	39,756,160	4,069,260	11.4%			
Vehicles & equipment	6,471,400	4,494,400	(1,977,000)	-30.5%			
Debt Services	6,127,000	5,294,000	(833,000)	-13.6%			
Total Operating Expenses &							
Capital Outlay	\$106,234,341	\$108,358,748	\$2,124,407	2.0%			

KEY ISSUES

- <u>No Rate Increase</u> None of the budgets for these three funds propose a service rate increase, although they were anticipated in the water and storm water funds. Due to the current economic condition, and the impact to residents and rate payers, including the General Fund, the Administration has elected not to pursue any rate increases this year. Rate increases will be, however, expected in coming years.
- <u>Capital Improvement Budget</u> Despite the proposal to avoid rate increases for this fiscal year, the three budgets all include capital improvements projects totaling

\$39,756,160, which is an increase over last year of more than \$4 million. According to the information provided by the Administration, there were some projects delayed - namely within the water fund - but overall, funding was maintained with the hopes of having a positive impact on the economy. It is anticipated that projects in coming years will require bond issuance in fiscal years 2012-13 and 2013-14.

- <u>Future Fiscal Impacts</u> Each of the funds rely heavily on the use of reserve funds to maintain the capital programs. This practice, even with modest rate increases, contributes to a shortfall in future years where needed capital improvements outpace revenues and cash-on-hand. This will be addressed during the department's presentation.
- <u>No salary increases</u> In order to hold expenses within the existing budgets, there are no proposed salary increases for employees. However, insurance costs did increase 9% across all three funds. In addition, the Department is proposing a cut of 3 FTEs between the water and sewer funds.

QUESTIONS FOR CONSIDERATION

- 1. The Council may wish to discuss the decision to delay rate increases across the three funds. A delay this year may result in higher rate increases in the future. For consideration, the Council could request some examples of the impact to customers if a rate increase were implemented this year.
- 2. The Council may wish to discuss how funds would be used if rate increases were imposed in the coming fiscal year.

For a more detailed view of each fund's budget, please see the following pages.

WATER UTILITY BUDGET, 2009-10

The operating budget for the Water Enterprise Fund for fiscal year 2008-09 is proposed to be \$43,463,179, which is an increase of \$957,091, or 2.3%.

WATER FUND						
PROPOSED BUDGET						
	Amended PROPOSED			ROPOSED		Percent
	2	2008-09		2009-10	Difference	Change
Revenue & other sources						
Charges for services	\$	50,232,000	\$	50,057,000	(175,000)	-0.3%
Interest income		450,000		370,000	(80,000)	-17.8%
Inter-fund charges		2,308,000		2,389,450	81,450	3.5%
Sale of used equipment		50,000		50,000	-	0.0%
Impact fees		500,000		500,000	-	0.0%
Grants and Other related		905,000		905,000	-	0.0%
revenues						
Bond proceeds				-	-	
Use of cash reserves		18,166,388		16,320,189		-10.2%
					(1,846,199)	
Total revenue & other	\$	72,611,388	\$	70,591,639	(0.040.740)	-2.8%
sources					(2,019,749)	
Expenses					(
Salaries, wages & benefits	\$	16,321,254	\$	16,313,790	(7,464)	0.0%
Materials & supplies		2,323,370		2,702,495	379,125	16.3%
Charges for services		23,861,464		24,446,894	585,430	2.5%
Total operating	\$	42,506,088	\$	43,463,179	957,091	2.3%
expenses						
Capital improvement		23,116,900		22,376,160	(740,740)	-3.2%
Vehicles & equipment		3,396,400		1,993,300		-41.3%
					(1,403,100)

Total Operating Expenses & Capital Outlay	\$	72,611,388	\$	70,591,639	(2,019,749)	-2.8%

The key points reflected in the proposed budgets for the Water Fund include:

Revenue Items:

- Water Rate Revenue (decrease of \$175,000) Although there are no proposed changes to the rates or rate structure, there is a possible decrease of rate revenue due to the likely approval of the Green Ditch contract. (The Council may recall a February briefing regarding a grant application for the Big Cottonwood Tanner / Green Ditch conservation and fire flow projects. The contract changes result in switching the irrigation water from an open canal delivery system, to water lines, and a voucher system. This may result in reduced revenue.)
- <u>Use of Reserve Funds</u> \$16,320,189 of reserve funds will be used toward capital projects this year. This is a decrease of \$1,846,199 from last year. The cash balance after use of these reserve funds will be \$8,667,703, which is the lowest in several years.

Normally, the department uses rate increases to fund a healthy portion of the planned

- capital projects. Without a rate increase this year, reserves will cover 73% of the \$22 million in capital improvements projects.
- Other Revenue Items Other minor changes in revenue items include the anticipated decrease in interest revenue due to lower interest rates and lower cash balances. Also, reimbursements from the sewer and storm water funds for bill processing and customer services.

Operating Expense Items:

• Purchase of Water from Metropolitan Water District – The largest increase to operating expenses is due to the purchase price for water from the Metropolitan Water District. For the proposed fiscal year, the rate per acre foot will increase to \$213, which is a \$13 increase per acre foot over last year and results in an increase to the budget of \$624,000. This will allow the Department to purchase 48,000 acre feet of water, which is keeping with the average over the past several years. The Department anticipates purchasing an average of 48,000 acre feet over the next several years, and in 2010 that amount may increase. The MWD has raised the rates for the past several years and anticipates rate increases in the coming years as well.

Year	Historical Rate (per acre foot)	Future Planned Rates
2004-05	\$150	
2005-06	\$163	
2006-07	\$175	
2007-08	\$188	
2008-09	\$200	
2009-10		\$213 (6.5%)
2010-11		\$219 (3%)
2011-12		\$226 (3%)

• Annual assessments for the Metropolitan Water District Capital Improvements – In addition to the purchase of water, the department pays a \$7 million assessment for Metropolitan Water District capital improvements. These payments continue in 2009-10, and will continue for the next 24 years. Sandy City is also making assessment payments to the Metropolitan Water District for their share of project costs.

The Metropolitan Water District budget is set by the Metro Water District Board. The Council will have the opportunity to review the budget and give feedback, but does not approve the budget.

<u>Personal Services</u> – overall decrease of \$7,464

- <u>Staffing Adjustments (decrease of \$133,000)</u> There are two proposed FTE reductions within the water fund through attrition. One position is a Water Treatment Plant Assistant Manager and the other is a meter reading position. In addition to these reductions, there were some positions reallocated to the sewer and storm water funds.
- <u>Salary adjustments (no change)</u> The Department is not proposing a salary increase for their employees this year. The City Council can adjust the salary budget following its salary decisions. Most of the Department's employees (77%) are 100 and 200 series employees with pay increases negotiated between the City and the American Federation of State County & Municipal Employees Local 1004 (AFSCME).
- Insurance & Benefit adjustments (increase of \$196,648) Insurance benefits are anticipated to increase citywide. For the Water Fund, an anticipated 9% or \$196,648 has been budgeted. The department's employees pay the same share of the insurance monthly premiums as general fund employees. In the event that the Administration proposes an increase from the 5% that employees currently pay, this item may change.
- Reclassifications (decrease of \$71,112) During the current fiscal year, there were some reclassifications for 100 and 200 series employees. This decrease in next fiscal year adjusts for the reclassifications made in the current fiscal year.
- <u>Materials and Supplies (increase of \$379,125 or 16%)</u> The increase is mostly due to an increase in treatment plant chemicals of \$252,000. The balance of the increase is due to various smaller increases in repair materials, lab supplies, postage, forms and printing costs, and maintenance supplies. There are various reductions to computer supplies and other miscellaneous items.
- <u>Charges for Services (increase of \$585,430 or 2.5%)</u> Charges for services is budgeted to increase by 2.5% largely due to the increase in cost of water from the Metropolitan Water District already discussed. The other larger changes include:

		<u>Increase / (Decrease)</u>
•	Utility Costs	\$ 91,630
•	Professional / Tech Services	86,000
•	Other various	21,800
•	Capitalizing barricade costs	(100,000)
•	Fleet - repair costs*	(65,000)
•	Utah Lake costs	(65,000)

*There is no decrease in fleet costs related to fuel, because the department did not adjust its fuel budget last year when the Administration made last minute changes.

Capital Budget

The following is included in the budget for capital improvements and purchases for fiscal year 2009-10.

• <u>Capital Outlay – Vehicles & Equipment (decrease of \$1,403,100 or 41%)</u> - The \$1,993,300 budgeted for capital purchases represents a significant decrease, but still

allows the department to replace the necessary vehicles and make treatment plant purchases as needed. For vehicles, some necessary heavy equipment replacements will be made, and other vehicles will be replaced with an emphasis on fuel efficiency. All in all, about 20 vehicles will be purchased and replaced. There are other decreases in treatment plant, pump, and other types of equipment purchases.

• <u>Continuation of the existing capital improvement program</u> – This budget of \$22.4 million is in addition to the assessments for the Metropolitan Water District capital improvements.

Proposed Capital Improvement Program					
Water Fund					
		2009-10			
Replacement of water lines and hydrants	\$	13,561,160			
Land Purchases (watershed purchases)	\$	1,000,000			
Reservoirs	\$	1,350,000			
Service Line Replacement & new connection	\$	2,200,000			
Treatment Plants	\$	755,000			
Pumping Plant Upgrades	\$	740,000			
Maintenance Buildings	\$	140,000			
Water meter replacement	\$	500,000			
Meter change out program	\$	800,000			
Culverts, flumes & bridges	\$	300,000			
Landscaping	\$	175,000			
Wells	\$	825,000			
Water stock purchases	\$	30,000			
Total Capital Improvement Program		\$22,376,160			

The Department has slightly decreased the budget for Capital Improvement projects by \$740,740.

- Waterline replacement program The Department plans to replace 68,748 linear feet of pipe in 2009-10. The \$1.4 million for the Big Cottonwood Tanner and Green Ditch fire protection improvement projects are budgeted with the waterline replacements. In the event that the \$300,000 in grant funds are awarded toward the BCT project, that would free up money for other replacements.
- Water meter replacement program As water meters age, they begin to inaccurately measure water use (under read). The Department has determined that it is cost effective to replace meters that are 15 years old. During the past five years, the Department has replaced 59,000 meters with about 19,000 of these being radio reading devices. Radio-read meters cost about \$140 more than regular meters and have a battery life of 8 to 10 years.
- <u>Future Bonding</u> Some larger projects scheduled for coming years include: \$4.7 million for a new water reservoir, \$3 million for pump station upgrades, \$2 million for well rehabilitation, and \$300,000 for culverts. It is anticipated that bonds would be issued for these projects.

QUESTIONS FOR CONSIDERATION

1. The Council may wish to ask about projects or purchases that will be funded with the watershed fee revenue.

Additional Information

WATER BACKGROUND

Salt Lake City's water delivery system to City and County residents depends on a complex network of dams, aqueducts, water treatment plants, distribution reservoirs, and water mains. Upkeep and maintenance of older systems and construction of new systems is very costly. The Department of Public Utilities has over 90,000 water service connections. The Department maintains treatment plants, wells, reservoirs, 1,190 miles of water mains, and 201 miles of conduit and supply lines.

Reclaimed and secondary water - The Department completed a water efficiency study in May 2002, which reviewed public green spaces and analyzed the cost effectiveness of implementing secondary water uses. The Department has hired an engineering consultant firm to determine the required water standards for the most likely customers and to identify the treatment processes to implement water reuse. The study will identify the capital projects required to implement water reuse. Pursuant to the City Council's "Legislative Intent" several years ago the Department of Public Utilities is moving forward with a wastewater reuse project at the Water Reclamation Plant for irrigation and industrial uses. This project will provide treated sewage effluent to over 424 acres of green space located near the treatment facility, including parks, golf course and new sports complex. This water will be treated and disinfected to meet public contact standards. The report noted that there was secondary water available from Utah Lake through the Jordan and Salt Lake City Canal on the City's eastside. The report noted the costs of constructing a dual secondary water system in established areas of the city and indicated that treating this source of water to remove dissolved salts, solids, odors and algae necessary to bring Utah Lake water to a level suitable for sprinkler irrigation was not cost effective at this time. It was recommended that secondary water systems be installed in growth areas (Northwest Quadrant). The most promising secondary water project was to reuse wastewater effluent at the City's Water Reclamation Plant located at 2300 north, west of I-15. The Department of Public Utilities is moving forward with this project.

LEGISLATIVE INTENT STATEMENTS

The Council did not issue any legislative intent statements last year relating to the Water Fund.

During the briefing on the proposed budget, the Council may wish to identify legislative intents relating to the Department of Public Utilities.

During the briefing, the Council may wish to identify potential programs or functions to be added to the Council's list for future audits.

SEWER UTILITY BUDGET, 2009-10

The operating budget for the Sewer Fund for fiscal year 2009-10 is proposed to be \$11,525,840 which is an increase of \$10,988 or 0.1% over fiscal year 2008-09. The capital budget, including debt service, is proposed to be \$17,424,100.

SEWER FUND PROPOSED BUDGET						
	Amended	Amended PROPOSED		Percent		
	2008-09	2009-10	Difference	Change		
Revenue & other sources						
Sewer service fees	\$ 16,500,000	\$ 16,500,000	\$ -	0.0%		
Interest income	400,000	250,000	(150,000)	-37.5%		
Permits	85,000	85,000	-	0.0%		
Impact fees	350,000	350,000	-	0.0%		
Other	667,000	645,000	(22,000)	-3.3%		
Use of cash reserves	6,556,852	11,119,940	4,563,088	69.6%		
Total revenue & other	\$ 24,558,852	\$ 28,949,940	\$ 4,391,088	17.9%		
Sources						
Expenses	\$ 6.849.872	\$ 6.764.583	\$ (85,289)	-1.2%		
Salaries, wages & benefits	+ - / / -	+ -, - ,	. (, ,	-1.2% -6.5%		
Materials & supplies Charges for services	1,306,010 3,358,970	1,221,310 3,539,947	(84,700) 180,977	5.4%		
Total Operating Expenses	\$ 11,514,852	\$ 11,525,840	\$ 10,988	0.1%		
Capital improvement	8,662,000	13,090,000	4,428,000	51.1%		
Vehicles & equipment	2,447,000	2,399,100	(47,900)	-2.0%		
Debt Services	1,935,000	1,935,000	-	0.0%		
Total Operating Expenses & Capital Outlay	\$ 24,558,852	\$ 28,949,940	\$ 4,391,088	17.9%		

The key points reflected in the proposed budgets for the Sewer Fund include:

Revenue Items:

- <u>No Rate Increase</u> There are no proposed rate increases for this fiscal year. The Department is not anticipating a rate increase until 2011-12, which will be tied to treatment plant projects.
 - Rate revenue is based on the water usage during winter months, since that is generally the usage attributable to showers, dishwashers, etc. (which constitutes waste water). Therefore, these revenues are generally tied to the rate of users' conservation.
- <u>Interest Income (decrease \$150,000)</u> adjustment to due to lower interest rates and the lower cash balances.
- <u>Use of Reserve Funds</u> \$11,119,940 in reserve funds will be used toward capital projects, which is an increase of 69% or \$4,563,088 over last year.

Operating Expense Items:

• Personal Services – overall decrease of \$85,289

- <u>Staffing Adjustments (\$50,112 decrease)</u> There is a proposed cut of 1 FTE, a waste water maintenance supervisor at the Reclamation Plant. This will be achieved through attrition. There is also a reallocation of some functions from the water fund.
- <u>Salary adjustments</u> There is no proposed salary increase for department employees. The City Council can adjust the salary budget for the Sewer Fund following its salary decisions. Most of the Department's employees (77%) are 100 and 200 series employees with pay increases negotiated between the City and the American Federation of State County & Municipal Employees Local 1004 (AFSCME).
- <u>Insurance & Benefit Adjustments</u> The Department is budgeting for an increase of 9% to insurance benefits and taxes of \$79,404. As with the other funds, the department's employees pay the same share of the insurance monthly premiums as general fund employees. In the event that the Administration proposes an increase from the 5% that employees currently pay, this item may change.
- Reclassifications (decrease of \$114,581) During the current fiscal year, there were some reclassifications for 100 and 200 series employees. This decrease in next fiscal year adjusts for the reclassifications made in the current fiscal year.
- <u>Materials and Supplies (overall decrease of \$84,700)</u> There is an anticipated decrease in sewer chemicals, building supplies, small tools, plus other miscellaneous reductions.
- <u>Charges for Services (overall increase of \$180,977)</u> This increase is largely due to \$160,000 for an audit of the sewer billing charges.

Capital Budget

The proposed budget reflects a total capital budget of \$17,424,100 for capital improvement projects, vehicle & equipment purchases, and debt service.

• Capital Improvement Projects (increase of \$4.4 million)

Proposed Capital Improvement Program					
Sewer Fund					
		2009-10			
Collection Lines	\$	7,165,000			
Treatment Plant	\$	5,260,000			
Maintenance & repair shops	\$	615,000			
Landscaping	\$	-			
Lift Stations	\$	50,000			
Total Capital Improvement Program	\$	13,090,000			

• The upgrades to the Reclamation Plant continue, including \$4 million for replacement of a digester roof, bafflers for the secondary clarifier, plus other equipment.

- More significant plans will likely require a bond issue in 2012-13. The projects will include a new primary clarifier, alternative disinfection, and a mechanical dewatering system.
- Last year, the Department began a "Sewer Master Plan Study". This year is the second year of the study. The budget includes \$400,000 for this second year, and the study will focus on major trunk lines in the City, with a continued emphasis on the Northwest Quadrant of the City. The study will look at growth and changes citywide for future planning purposes.
- Last year, the Department had planned a more major renovation of the Maintenance & Repair Shop. The work was delayed until this year for energy reviews, and this year's budget includes the project for \$615,000 for the heating and air conditioning in the lab, a new security system, and a new roof.
- <u>Vehicle & Equipment Purchases (\$47,900 decrease)</u> The \$2,399,100 budget for capital outlay will include \$979,000 in heavy machinery and field maintenance equipment, \$623,100 in non-motive equipment such as pipeline profiler equipment, \$550,000 in treatment plant equipment, \$172,000 in vehicle purchases, and other miscellaneous items.

QUESTIONS FOR CONSIDERATION

1. The Council may wish to ask for more information about the planned upgrades to the sewer treatment plant, and how the current upgrades fit together with future bond projects.

Additional Information

SEWER FUND BACKGROUND

The Department of Public Utilities has over 49,340 sewer connections. The Sewer Fund maintains 641 miles of sanitary sewer pipe and connection lines. The reclamation plant treats an average of 35,000,000 gallons of sanitary sewer per day. Maintaining the sewer lines and operating the lift stations and reclamation plant is accomplished with 99.9 employees. Effective January 1, 2001, sewer fees are based on discharge strength as well as volume. Approximately 2,500 of the 49,340 accounts are charged an additional fee because they discharge sewage with strengths greater than domestic or residential sewer flows. This change sets rates so that residential customers or commercial customers with domestic discharges do not subsidize customers with greater than domestic strength discharges. This rate structure encourages businesses to reduce discharge strengths.

LEGISLATIVE INTENT STATEMENTS

No legislative intent statements are outstanding for the Sewer Fund.

During the briefing on the proposed budget, the Council may wish to identify legislative intents relating to the Department of Management Services.

During the briefing, the Council may wish to identify potential programs or functions to be added to the Council's list for future audits.

STORM WATER UTILITY BUDGET, 2009-10

The operating budget for the Stormwater Fund for fiscal year 2009-10 is proposed to be \$3,825,169, which is a decrease of \$102,932 or 2.62% over fiscal year 2008-09. The capital budget, including debt service, is proposed to be \$4,992,000.

STORMWATER FUND									
PROPOSED BUDGET									
	Amended Proposed Percent								
	2008-09	2009-10	Difference	Change					
Revenue & other sources									
Stormwater service fee	\$5,245,000	\$5,245,000	\$0	0.00%					
County Flood Control			-						
Interest	150,000	150,000	•	0.00%					
Impact fees	200,000	200,000	-	0.00%					
Systems constructed by developers	516,000	516,000	-	0.00%					
Other revenue	10,000	10,000	-	0.00%					
Use of reserves	2,943,101	2,696,169	(246,932)	-8.39%					
Total revenue & other	\$9,064,101	\$8,817,169	(\$246,932)	-2.72%					
sources									
Expenses									
Salaries, wages & benefits	\$1,725,139	\$1,777,096	\$51,957	3.01%					
Materials & supplies	111,700	112,700	1,000	0.90%					
Charges for services	2,091,262	1,935,373	(155,889)	-7.45%					
Total operating expenses	\$ 3,928,101	\$ 3,825,169	\$ (102,932)	-2.62%					
Capital improvement	3,908,000	4,290,000	382,000	9.77%					
Vehicles & equipment	628,000	102,000	(526,000)	-83.76%					
Debt Service	600,000	600,000	-	0.00%					
Total Expenses & Capital Outlay	\$9,064,101	\$8,817,169	(\$246,932)	-2.72%					

The key points reflected in the proposed budget for the Storm Water Fund include:

Revenue Items:

- <u>No rate increase</u> A rate increase is not proposed, but is likely next fiscal year for 3%. Salt Lake City has not raised its storm water rate since the program's start in 1990. Next year's rate increase would support cash reserve levels for capital improvement projects.
- <u>Use of reserves</u> There is a reduction of \$245,932 in the amount of reserve funds anticipated to be used toward capital projects.

Operating Expense Items:

• Personal Services (increase \$51,957) – There are no proposed salary increases for employees within the storm water fund. However, as with the other utility funds, an insurance premium increase of 9% or \$20,820 is expected. The City Council can adjust the salary budget following its salary decisions. Most of the Department's employees (77%) are 100 and 200 series employees with pay increases negotiated

between the City and the American Federation of State County & Municipal Employees Local 1004 (AFSCME).

- Charges for Services (decrease of \$155,889)
 - <u>Riparian Corridor Study 1st Phase Complete (decrease of \$175,000)</u> A large portion of the "Charges for Services" budget is for the Riparian Corridor Study. \$600,000 was budgeted in fiscal year 2008-09, and Phase 1 has been completed on Emigration and Red Butte Creeks.
 - This decrease is offset by an increase of \$20,000 for water use, and other minor changes.

Capital Budget

The proposed budget reflects a total capital budget of \$4,992,000 for capital improvement projects, vehicle & equipment purchases, and debt service. This is a decrease of \$144,000 from last year.

• Capital Improvement Projects (increase of \$382,000)

The proposed budget reflects a capital improvement budget of \$4,290,000 for fiscal year 2009-10, which is a 9.7% increase from last year.

Proposed Capital Improvement Program				
Storm Water Fund				
	2009-10			
Collection Lines	\$ 3,940,000			
Lift Stations	\$ 100,000			
Land	\$ 250,000			
Total Capital Improvement Program	\$4,290,000			

The proposed \$4,290,000 budget for capital improvement projects is an increase of \$382,000 from last year's amended budget.

• <u>Vehicle & Equipment Purchases (\$526,000 decrease)</u> – This year's proposed capital equipment budget anticipates spending \$102,000 on one vehicle and one dump truck.

Additional Information

STORM WATER BACKGROUND

The Department of Public Utilities maintains over 460 miles of stormwater pipe and collection lines using 26.3 employees. It was 1991 when the General Fund transferred the entire storm drain system under Public Utilities management. July 1991 began the implementation of a new stormwater fee based on surface area. Since that time, there have been no rate increases; no public tax dollars have been used to help the system. Storm water employees also monitor the snow pack water content and manage the storm water permit process.

LEGISLATIVE INTENT STATEMENTS

Storm Water Education – It is the intent of the City Council that the Department of Public Utilities propose additional education efforts to inform the public about illegal dumping in storm drains. Additional efforts could include, but are not limited to, increasing signage in neighborhoods and recommendations to adjust fines. (Adopted June 2008)

During the briefing on the proposed budget, the Council may wish to identify legislative intents relating to the Stormwater Fund.

During the briefing, the Council may wish to identify potential programs or functions to be added to the Council's list for future audits.

SUBJECT: Request for a briefing on proposed Public Utilities budget for 2009-2010.

STAFF CONTACT: Jim Lewis, Finance Administrator (483-6773)

DOCUMENT TYPE: Budget Request

RECOMMENDATION: Approval of 2009–2010 budget

BUDGET IMPACT:

Proposed Budget for 2009-2010

	Operating Cost	Debt Service	Capital	Total
Water Utility	\$43,472,179	\$2,750,000	\$24,369,460	\$70,591,639
Sewer Utility	\$11,525,840	\$1,935,000	\$15,489,100	\$28,949,940
Stormwater Utility	\$3,825,169	\$600,000	\$4,392,000	\$8,817,169
Total	\$58,823,188	\$5,285,000	\$44,250,560	\$108,358,748

Major budgetary Topics

- Delay rate changes due to Economic impact on General Fund and customers.
- Strong capital program will continue for this year.
- Reduction of 3 FTEs saving \$211,000.

BACKGROUND/DISSCUSSION:

The Public Utilities Advisory Committee on February 26, 2009, recommend to the Mayor the adoption of the proposed budget for 2009-2010. The budget document is attached, listing summary of major budget changes and capital improvement projects proposed for the next five-year period for all three Utility Funds.

Major budgets recommendations are:

2009 Rates not Changing.

The Department has decided to delay changing rates so as not to impact customers that are already feeling the pinch of a struggling economy. Although rate changes are planned in the next few years to help keep the utility financially healthy, the increases are only to maintain a strong capital improvement program and to provide uninterrupted service.

Reduced Three Full-time Employee Position.

This staff reduction will save the Department \$211,000. This is two water positions, a meter reader and an assistant water plant manager. The Sewer Fund will decrease by one waste water maintenance supervisor. Also as asked by the Mayor, the personal services budget shows a 0% increase from the previous year except for the 9% increase in health benefits.

Metropolitan Water District.

Based upon a previously approved rate structure, the wholesale price of water from Metropolitan will increase 6.5% next year. Public Utilities will pay for treated water at a rate of \$213 per Acre Foot up from \$200 this year. Metropolitan water is expected to cost \$624,000 in 09-10.

The Metro approved rate structure for the next five years is:

2010-11	\$219 af	3%	2012-13	\$233 af	3%
2011-12	\$226 af	3%	2013-14	\$240 af	3%
2014-15	\$247 af	3%			

Sewer Master Plan Study Continues.

The second phase of the Sewer Collection System Master Plan will cost about \$400,000 and will likely take much of 2009 to complete. The study will provide the Department a management assessment strategy and plan to repair or replace damaged mains and improve existing capacity of the pipes to handle the expected growth in the Salt Lake area.

Stormwater Riparian Corridor Study.

This study was started in the 2008-09 budget but is expected to conclude in the 2009-10 budget. The expected budget this year will be about \$300,000 for this second phase. Recommended improvements and financial impact of this study are still too early to predict.

Fire Protection Improvements.

Public Utilities and Green Ditch Irrigation are negotiating an agreement that will be similar to their sister Big Cottonwood Tanner Ditch Irrigation Company. This would resolve water rights disputes and fire protection issues to improve public safety and water service for this part of the City's water service area. The Water Utility has budgeted \$8 million to complete these projects.

Maintain Strong Capital Improvement Program in all Fund.

The goal of the Department is to replace the following lengths of deteriorated pipe:

Water- 68,748 linear feet of pipe Sewer- 20,387 linear feet of pipe Storm- 11,900 linear feet of pipe

Salt Lake City Corporation

As of March 12, 2009

SALT LAKE CITY PUBLIC UTILITIES BUDGET FOR FISCAL YEAR 2009 - 2010

LE CITTLE AND ADDRESS OF THE PARTY OF THE PA

Public Utilities Review & Approval

effty T. Niermeyer, Director

Dick Gaddis PUAC, Chairman

2009-2010 Executive Summary

Department Budget Issues, Objectives and Goals

With the impact of the economy in the past few months, the Department reexamined its needs and future strategy as the budget both affects the rate payers and general City Government. This proposed budget has been prepared to have as little an impact on the public and general City Government as possible. Managers were asked to provide a budget that will continue to give a top quality product and service but with an eye to cost cutting measures and value added principles.

Highlights of the current budget proposal include:

- Delay rate increases to Water, Sewer and Stormwater because of economic sensitivity.
- Eliminate three full time positions through attrition.
- Cost of buying Metropolitan's water increases \$624,000.
- \$400,000 Continuation of Sewer Master Plan capacity study.
- \$300,000 Continuation of Riparian Corridor Study.
- Fire protection upgrade of pipe size and system pressure for \$8 million.
- Maintain replacement level of capital program for all funds.

2009 Rates not Changing.

The Department has decided to delay changing rates this year to avoid impacting customers that are already feeling the pinch of a struggling economy. Although rate changes are planned in the next few years to help keep the utility financially healthy, the increases are designed to maintain a strong capital improvement program and to provide uninterrupted service. Bond issues will be needed in the near future to handle some of the very large capital improvements that can be funded in no other way. Increased rates will be required to pay the additional debt financing anticipated in the future years.

Possible Rate Increases for Future Years.

Proposed future rates could be as follows:

Future Planned Rate Increases					
Fiscal Year	Water	Sewer	Stormwater		
2010/11	7%	0%	3%		
2011/12	7%	4%	3%		
2012/13	8%	4%	3%		
2013/14	8%	4%	3%		

Reduced Three Full-time Employee Position.

This staff reduction will save the Department \$211,000. The reduction will consist of two water positions, a meter reader, an assistant water plant manager and one Sewer position, a waste water maintenance supervisor.

Metropolitan Water District.

Based upon a previously approved rate structure, the wholesale price of water from Metropolitan will increase 6.5% next year. Public Utilities will pay for treated water at a rate of \$213 per Acre Foot (AF) up from \$200 this year. Metropolitan water is expected to cost an additional \$624,000 in 09-10.

The Metro approved rate structure for the next five years is:

2010-11	\$219 af	3%	2012-13	\$233 af	3%
2011-12	\$226 af	3%	2013-14	\$240 af	3%
2014-15	\$247 af	3%			

Sewer Master Plan Study Continues.

The Sewer Collection System Master Plan will cost about \$400,000 in FY 09/10 and will be completed in late fall 2009. The study will provide the Department a condition assessment strategy and asset management plan to repair or replace damaged mains and improve existing capacity of the pipes to handle the expected growth in Salt Lake City.

Stormwater Riparian Corridor study.

This study was started in the 2008-09 budget but is expected to conclude in the 2009-10 budget. The expected budget this year will be about \$300,000 for FY 09/10 phase. Recommended improvements and the financial impact of this study are still too early to predict.

Fire Protection Improvements.

Public Utilities and Green Ditch Irrigation are negotiating an agreement that will be similar to the Big Cottonwood Tanner Ditch Irrigation Company. This would resolve water right disputes and fire protection issues to improve public safety and water service for this part of the City's water service area. The Water Utility has budgeted \$8 million (\$4 million for the Tanner Project and \$4 million for Green Ditch) to replace water lines that will increase water volume and pressure by replacing small size waterlines in the affected service area. This settlement will resolve water rights and provide an allocation of unbilled water to Green Ditch shareholders.

Maintain Strong Capital Improvement Program in all Fund.

The goal of the Department is to replace the following lengths of deteriorated pipe:

Water- 68,748 linear feet of pipe Sewer- 20,387 linear feet of pipe Storm- 11,900 linear feet of pipe

The Salt Lake City water distribution system (WDS) is very large (1,190 miles of 12" or smaller distribution lines plus 201 miles of large transmission mains for a total footage of 1,391 miles of pipe in 2008) and complicated (over fifty pressure zones). The service area covers the Salt Lake City corporate boundaries as well as the east side of the Salt Lake valley all the way to the mouth of Little Cottonwood Creek. Figure 1 shows an aging system with corrosion and other factors that affect the competency of the water pipes. There is a continual need to repair and replace bad pipe segments to maintain service and reduce emergency break repair costs and impacts to the public. Figure 2 shows that 90 miles of water main were replaced in the last ten years.

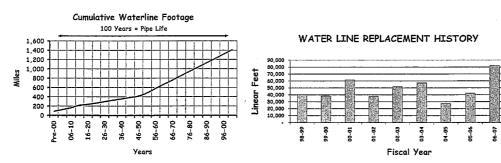

Figure 1. Pipeline Age for the Salt Lake City Water Distribution System

Figure 2. Water System Repair and Replacement Program

The sewer collection system is a very corrosive environment with hydrogen sulfide gases, sediment, roots and other factors that affect the competency of the pipes. With this type of environment there is a continual need to repair and replace bad pipe segments. More than 50% of the sewer collection system is more than 75 years old (Figure 3). The goal for Sewer is to rehab at least 0.6% of our old pipe system every year (Figure 4).

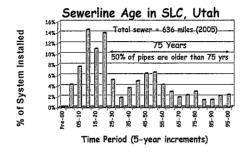

Figure 3. Pipeline Age for the Salt Lake City Sewer Collection System

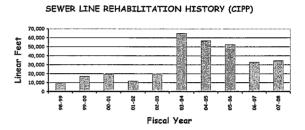

Figure 4. Sewer System Restoration Program

The last Drainage Master Plan was completed in 1993. The projects identified in the Master Plan will take at least another 15 years to complete. In the last ten years almost 40 miles of storm drain pipe has been installed (Figure 5). Some of the major projects are listed in Figure 6.

WATER UTILITY ENTERPRISE FUND

SUMMARY OF MAJOR BUDGET ISSUES

The recommended budget for the Water Fund for fiscal year 2009-2010 illustrates a decrease in all expenditures by \$2.02 million or (2.78%).

• Rates will remain unchanged

Water rates have increased every year since 2000. Much of the reason for the increases have centered around replacing the aging infrastructure. The Department has needed to keep revenues growing slightly to pay for increasing costs associated with system infrastructure and debt coverage. The need for improvements is not anticipated to change in the near future, but with the struggling economy, management decided to delay specific projects to reduce costs.

• Cost of purchases from the Metropolitan Water District increases
This budget includes an anticipated increase in the cost of treated water
from the Metropolitan Water District with water rates going from \$200
per AF to \$213 per AF with an additional cost of \$624,000.

Metro water rate increases are expected for each of the next five years:

2010-11	\$219 af	3%	2012-13	\$233 af	3%
2011-12	\$226 af	3%	2013-14	\$240 af	3%
2014-15	\$247 af	3%	•		

Analysis of Estimated Revenue

An analysis of the estimated revenue contained in the Department's recommended Budget for the Water Fund is as follows.

Davianna	Amended Budget	Proposed Budget 2009-2010	Diff	Domont
Revenue	2008-2009	AND DESCRIPTION OF THE PROPERTY OF THE PROPERT	Difference	Percent
Charges for services	\$50,232,000	\$50,057,000	(\$175,000)	-0.35%
Interest	450,000	370,000	(80,000)	-17.78%
Interfund charges	2,308,000	2,389,450	81,450	3.53%
Sale of used equipment	50,000	50,000	0	0.00%
Impact fees	500,000	500,000	0	0.00%
Contributions by Developers	905,000	905,000	0	0.00%
Bond proceeds	0	0	. 0	0.00%
Use of Reserve Funds	18,166,388	16,320,189	(1,846,199)	-10.16%
TOTAL	\$72,611,388	\$70,591,639	\$ (2,019,749)	-2.78%

Revenue from Charges for Services: The proposed budget reflects a slight decrease from potentially less water sales as customers continue to conserve and a possible drop in revenue of \$175,000 if the Green Ditch Irrigation contract is approved.

<u>Interest Income</u>: This should decrease as cash is expected to drop because of the continuation of existing projects to finish and the drop in investment returns with falling interest rates.

<u>Interfund Charges and Other Reimbursements</u>: The Water Utility processes bills and handles customer service complaints for the Sewer, Stormwater and the Refuse Fund.

<u>Contributions by Developers</u>: Accounting standards require contributions by developers to be classified as non-operating revenue. Although a conservative figure about half of this amount is expected to be non-cash contributions. This depends on the economy and growth.

<u>Impact Fees</u>: Impact fees are a conservative estimate and are fully dependent on new growth or expansion. Funds obtained are used for projects directly related to the new growth or expansion. No change estimated this year.

<u>Reserve Funds</u>: Without a rate increase the Department expects to draw on over \$16 million of its reserves to pay for continued projects and new projects needed for the water system.

Analysis of Proposed Expenditures

The expenditure budget for the Department is proposed to decrease by (\$2,019,748) or 2.78% over the 2008 - 2009 budget. The proposed budget for fiscal year 2009 - 2010 by major category is as follows:

Major Expenditure Category	Amended Budget 2008-2009	Proposed Budget 2009-2010	Difference	Percent
Personal services	\$16,321,254	\$16,313,790	\$ (7,464)	-0.05%
Materials and supplies	2,323,370	2,702,495	379,125	16.32%
Charges for services	23,861,464	24,446,894	585,430	2.45%
Debt service	3,592,000	2,759,000	(833,000)	-23.19%
Capital outlay	3,396,400	1,993,300	(1,403,100)	-41.31%
Capital improvement program	23,116,900	22,376,160	(740,740)	-3.20%
TOTAL	\$72,611,388	\$70,591,639	\$(2,019,749)	-2.78%

<u>Personal Services</u>: The proposed budget drops <7,464> from last year based on a 0% salary projection along with a 9% insurance increase. This budget also includes the elimination of 2 positions through attrition, saving the Department \$133,000.

<u>Materials & Supplies</u>: The proposed budget for materials and supplies will increase 16% in the amount of \$379,125 for the following reasons:

- Increase in treatment plant chemicals of \$252,000
- Increase in repair materials of \$79,775.
- Increase in lab supplies of \$22,500
- Increase of sand and gravel purchases of \$20,000
- Increase in ground maintenance supplies of \$17,500.
- Increase in postage due to rate increase of \$10,000
- Increase in small tools and equipment of \$3,900
- Increase in special forms, office and building supplies are of \$4,050.
- Decrease in computer supplies and non-motive parts is (\$29,600)
- Other miscellaneous reductions of (\$1,000)

<u>Charges for Services</u>: The Department proposes the following budget changes to the charges for services as it increases \$585,430:

- Increase of \$624,000 for water purchases and treatment from the Metropolitan Water District.
- Increase in utility costs for power and natural gas of \$91,630.
- Increase in professional and technical services of \$86,000.
- Increase in waste disposal costs of \$10,000.
- Increase transfers of costs to the general fund of \$9,000.
- Decrease from capitalizing barricade costs of <\$100,000>.
- Decrease in fleet costs of <\$65,000>.
- Decrease in Utah Lake costs of <\$65,000>.
- Decrease in data process costs of <\$8,000>
- Other various increases of \$2,800.

Capital Outlay: The proposed Water budget for fiscal year 2009 - 2010 includes capital outlay for the replacement of vehicles and heavy equipment which are worn out and no longer cost effective to maintain, and also to provide better and more fuel efficient vehicles. Although capital outlay is nearly \$1.4 million less than the previous year, the Department is still replacing about 20 vehicles. Based upon core function needs (maintenance, snow travel, etc), most of the replacements are ½ ton pickups. The Department reviewed vehicle requirements to reduce both the size and type of vehicle to better suit the Department's needs. Other reductions are mostly in treatment plant equipment, pump equipment and various non-motive equipment.

<u>Capital Improvement Program</u>: The Department's proposed CIP budget for fiscal year 2009 - 2010 is \$1 million less than the previous year but still an aggressive proposal despite the changes to the economy. Capital project summary by facility types are as follows:

Proposed Capital Improvement Program for Fiscal Year 2009-2010					
Type of Project	Budget Amount				
Replacement of water lines and hydrants	\$13,561,160				
Reservoirs	1,350,000				
Treatment plants	755,000				
Wells	825,000				
Maintenance buildings	140,000				
Water meter replacement	500,000				
Meter change out program	800,000				
Culverts, flumes & bridges	300,000				
Water stock purchases	30,000				
Land purchases	1,000,000				
Landscaping & Conservation Projects	175,000				
Service Line Replacement & new connection	2,200,000				
Pumping Plant Upgrades	740,000				
Total 2007-2008 Capital Improvement Program	\$22,376,160				

There are no major changes in the water capital budget. Replacement of water lines is still very consistent with last year and includes funding for the Big Cottonwood Tanner and Green Ditch fire protection project which will improve capacity and water pressure in the County service area. This budget will continue the watershed purchase program level of \$1 million appropriated for land purchases. Once again the replacement of service connections, meters and meter change outs is a \$3.5 million program. Reservoir repairs will run \$1.35 million and a new pump station is costing \$500,000 but will be paid for through impact fees.

SEWER UTILITY ENTERPRISE FUND

SUMMARY OF MAJOR POLICY ISSUES

The Department's recommended Sewer Utility budget for fiscal year 2009 - 2010 shows an increase in expenditures \$4,391,267 or 17.9%. This breaks down to a \$180,000 increase in operations and the remaining increase is from capital improvements.

- <u>Sewer Reclamation Plant Continues to Upgrade</u> The major items planned for the plant this year is \$4 million on digester roof replacement and bafflers for the secondary clarifier. Significant changes and upgrades are still planned in 3 years that could require a \$10 million bond issue.
- Trunk Line Master Plan Study Phase II— The \$400,000 in FY 09-10 for this tow year study is part of the sewer master plan to examine the major trunk lines in the City with emphasis on the Northwest Quadrant and major trunk lines into the treatment plant. The study will update the capital and O& M needs based on condition of the pipes and capacity needs for growth in Salt Lake City.
- Rates will not increase this Year Although rates are not changing for the next fiscal year budget, a rate hike is postponed until 2011-12 in preparation of additional treatment plant needs and a \$10 million bond issue that will be needed to continue a strong capital improvement program.

Future Planned Rate Increases				
2009/10	0%			
2010/11	0%			
2011/12	4%			
2012/13	4%			
2013/14	4%			

Analysis of Revenue

An analysis of the estimated revenue contained in the Mayor's Recommended Budget is as follows.

Revenue	Amended Budget 2008-2009	Proposed Budget 2009-2010	Difference	Percent
Sewer Services Fees	\$16,500,000	\$16,500,000	\$.0	0.00%
Interest	400,000	250,000	(150,000)	-37.50%
Permits	85,000	85,000	. 0	0.00%
Other	157,000	135,000	(22,000)	-14.01%
Impact Fees	350,000	350,000	0	0.00%
Contribution by Developers	500,000	500,000	0	0.00%
Sale of Property	10,000	10,000	0	0.00%
Reserve Funds	6,556,852	11,119,940	4,563,088	69.59%
TOTAL	\$24,558,852	\$28,949,940	\$4,391,088	17.88%

Explanation of revenue

<u>Sewer service fees</u>: With no rate change this year, revenue is expected to remain flat.

<u>Interest Income</u>: Interest income is expected to decrease with the drop in interest rates and less cash to invest.

Permit fees: No change.

Other income: Sewer dumping fees are expected to decrease < \$22,000>.

<u>Impact Fees</u>: These fees are expected continue at about the same pace as the previous year.

<u>Reserve Funds</u>: Reserve funds of \$11,119,940 will be required to provide the additional financing gap needed to assist with our capital funding. These funds are from prior year earnings and will directly reduce the utilities cash reserves.

Analysis of Expenditures

The expenditure budget for the Department is proposed to increase \$4,391,088 or 17.9% over the 2008 - 2009 budget. As shown below, the increase is driven by capital improvements. The proposed budget for fiscal year 2009 - 2010 by major category is as follows:

Major Expenditure Category	Amended Budget 2008-2009	Proposed Budget 2009-2010	Difference	Percent
Personal services	\$6,849,872	\$6,764,583	\$ (85,289)	-1.25%
Materials and supplies	1,306,010	1,221,310	(84,700)	-6.49%
Charges for services	3,358,970	3,539,947	180,977	5.39%
Debt services	1,935,000	1,935,000	0	0.00%
Capital improvements	8,662,000	13,090,000	4,428,000	51.12%
Capital outlay	2,447,000	2,399,100	(47,900)	-1.96%
TOTAL	\$24,558,852	\$28,949,940	\$4,391,088	17.88%

<u>Personal Services</u>: The proposed budget drops <85,289> from last year based on a 0% salary projection along with a 9% insurance increase. This budget also includes elimination of one full-time position, saving the Department \$78,000.

<u>Materials & Supplies</u>: The proposed budget for materials and supplies decreased (\$84,700). These changes are:

- Decrease in sewer chemicals of <\$44,000>.
- Decrease in city building supplies of <\$35,000>
- Decrease in small tools of <\$2,000>.
- Plus various other small increases and decrease of about <\$4,700>.

<u>Charges for Services</u>: The section of charges and services increased \$180,977 in the following areas

- Professional and technical services increased \$177,500
 - ✓ Increase of chemical analysis of \$18,000
 - ✓ Increase of \$160,000 for audit of Sewer Utility billing charges.
 - ✓ Decrease in rental equipment of <\$500>.
- Utility costs increased \$8,397.
- Travel decreased <\$2,000>.
- Fleet maintenance costs decreased <\$20,000>.

- Other charges and services increased \$17,080
 - ✓ Increase of interfund charges of \$8,880.
 - ✓ Transfers to the General Fund of \$8,500
 - ✓ Waste disposal increased \$2,000
 - ✓ Decrease in security of <\$2,000>.
 - ✓ Decrease of <\$300> in meal allowance.

<u>Debt Service</u>: - The annual debt service is expected to remain the same.

<u>Capital Outlay:</u> - The proposed capital outlay budget decreases \$47,900. Field maintenance equipment increases almost \$500,000 and small non-motive equipment increase \$161,000. Auto and trucks decrease \$207,000 over the previous year. Some of these are items that will be carried over from the prior year budget that were not ordered in time to arrive in the 2008/09 budget year.

Capital Improvements: - The proposed capital improvements budget increases \$4.4 million. Plant upgrades include \$5.2 million for plant equipment such as odor control and secondary treatment expansion. \$7.2 million allocated for sewer collection lines as we replace some of the large critical lines in the system. The Department is re-budgeting a major repair for the lab heating and air conditioning and new roof that has been delayed while consultants review energy needs for buildings. The Department also budgeted an upgrade to the plant security system

Listed below by category are the general project types that are budgeted for fiscal 2009-10

Proposed Capital Improvement Program for Fiscal Year 2009-2010						
Type of Project	Budget Amount					
Land	\$ 0					
Maintenance and repair shops	615,000					
Lift Stations	50,000					
Treatment Plant	5,260,000					
Collection Lines	7,165,000					
Landscaping	0					
Total 2009 – 2010 Capital Improvement Program	\$13,090,000					

STORMWATER UTILITY ENTERPRISE FUND

SUMMARY OF MAJOR BUDGET ISSUES

The recommended budget for the Stormwater Fund for fiscal year 2009 – 2010 decreases for all costs by (\$177,360) or 1.96 %. A budget error included in the 2008-09 budget accounts for nearly all the decrease and was removed from this year's budget. This budget will maintain the core functions of the Stormwater Fund to the level of the previous year.

- Riparian Corridor Phase II \$300,000 is set to continue the City's Riparian Corridor Study of Red Butte, Emigration, Parleys and City Creek. The Riparian Corridor Overlay District was created January 15, 2008 by City Council ordinance to protect vegetative zones open ground streams, to minimize erosion, stabilize the banks, protect water quality, enhance fish and wildlife habitat and preserve the esthetic values of the natural watercourses. The study will help the Department establish protocols to achieve a reasonable balance between the residential users and the riparian area.
- Again no rate increase proposed this year However, a future rate change of 3% is suggested by the Department's advisory council for the next several fiscal years. This change would generate an additional \$160,000 each year and will keep the cash reserves at a reasonable level. The Stormwater Fund created in 1991 has not had an increase since inception. Below is the proposed schedule:

Future Planned Rate Increases					
2009/10	0%				
2010/11	3%				
2011/12	3%				
2012/13	3%				
2013/14	3%				

Analysis of Estimated Revenue

An analysis of the estimated revenue contained in the utility's recommended budget for the Stormwater Fund is as follows.

Revenue	Amended Budget 2008-2009	Proposed Budget 2009-2010	Difference	Percent
Operating Sales	\$5,245,000	\$5,245,000	\$ 0	0.00%
Interest	150,000	150,000	. 0	0.00%
Impact fees	200,000	200,000	0	0.00%
Contributions by Developers	516,000	516,000	0	0.00%
Other	10,000	10,000	0	0.00%
From (To) Reserves	2,943,101	2,696,169	(246,932)	-8.39%
TOTAL	\$9,064,101	\$8,817,169	\$(246,932)	-2.72%

Operating Sales: - Total sales are expected to remain unchanged this year.

<u>Interest Income</u>: Interest does drop but we still expect to earn the same.

Impact Fees: With the slow economy impact fees are unchanged.

Contributions by Developers: No change is expected.

Other Fees: No change is expected.

Reserve Funds: - Similar to the past year's budget about \$2.7 million will be required to fund capital improvements.

Analysis by Proposed Expenditures

The expenditure budget for the Department is proposed to decrease \$(246,932) or 2.72% over the 2008-2009 budgets. The proposed budget for fiscal year 2009 - 2010 by major expenditure category is as follows:

Major Expenditure Category	Amended Budget 2008-2009	Proposed Budget 2009-2010	Difference	Percent
Personal services	\$1,725,139	\$1,777,096	\$ 51,957	3.01%
Materials and supplies	111,700	112,700	1,000	0.90%
Charges for services	2,091,262	1,935,373	(155,889)	-7.45%
Debt Service	600,000	600,000	0	0.00%
Capital improvements	3,908,000	4,290,000	382,000	9.77%
Capital equipment	628,000	102,000	(526,000)	-83.76%
TOTAL	\$9,064,101	\$8,817,169	\$(246,932)	-2.72%

<u>Personal Services</u>: The proposed budget increases 51,957 from last year based on a 0% salary projection along with a 9% insurance increase. The increase of 3.01% is related to employee upgrades that took place in the previous year but unbudgeted in the year of comparison.

Materials & Supplies: The proposed budget for materials and supplies increases by \$1,000. Parts, building supplies, sand and gravel create the difference.

<u>Charges & Services</u>: This has decreased by \$155,889 in the various categories listed below:

- * Decrease of <\$175,000> completion of the first phase of the riparian corridor study.
- * Increase of \$20,000 for water used in the utility not previously budgeted.
- * Decrease in transfer out of <\$889>

<u>Debt Service</u>: The amount of debt service will remain the same for several years.

<u>Capital Equipment</u>: The proposed capital equipment budget decreases 83% or \$498,000 and will only purchase one vehicle and one dump truck.

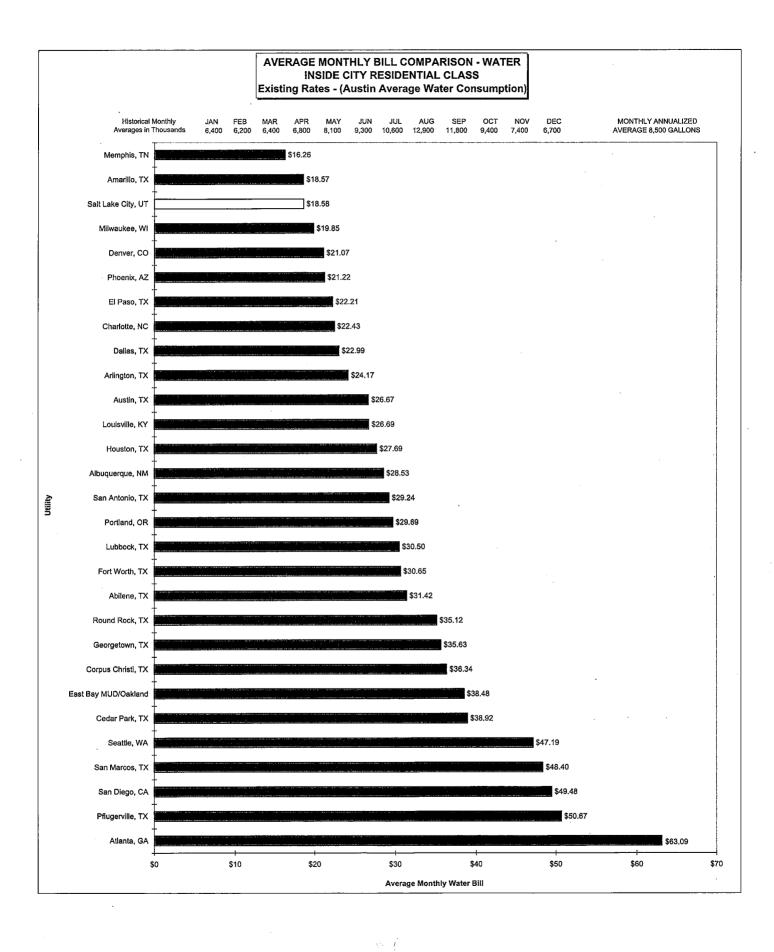

<u>Capital Improvements</u>: The proposed budget of \$4,290,000 is \$120,000 higher than last year. This budget does include several projects that will either be under construction or carried over from the prior year.

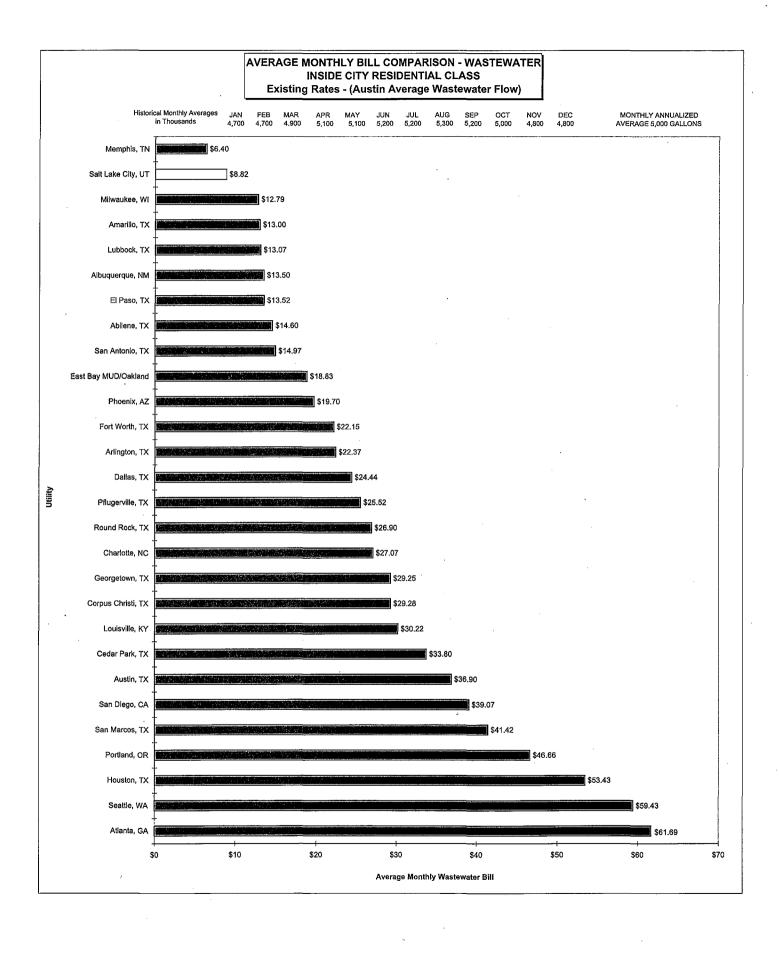

The capital improvement budget for 2009 – 2010 includes projects as follows:

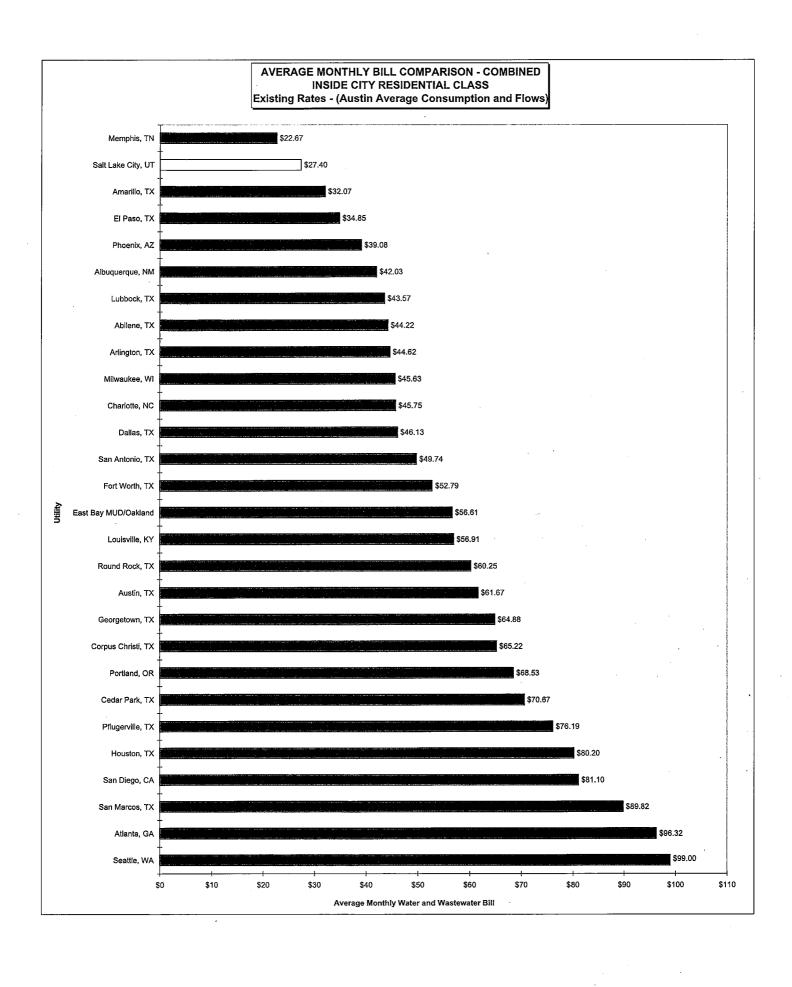

Proposed Capital Improvement Program for Fiscal Year 2009-2010				
Type of Project		Budget Amount		
Land	\$	250,000		
Lift Stations	\$	100,000		
Collection Lines	\$	3,940,000		
Total 2009 – 2010 Capital Improvement Program	\$	4,290,000

STATEMENT OF PURPOSE

Administrative Division oversees and manages the Department policies, training, media contact, and the affairs of the Department with and on behalf of the Mayor both internally and with other external political organizations.

BASE PURPOSE STATEMENTS

This Division provides coordinated direction and support to carry out the Department's goals and policies and ensures that all construction contracts, water exchange agreements, ordinances and federal regulations are met. This section is also responsible for department-wide training and managing the human resource issues. Operating budget includes large inter-department wide expenditures of payment in lieu of taxes, administrative service fees, insurance premium, workman compensation estimates, and major consultant studies. This next year the department will complete three major studies (1) Water rate study (2) Sewer Master Plan (3) Storm Water Riparian Corridor Study. The department will also develop a strategic master plan and implement a plan to reduce our carbon footprint.

STATEMENT OF PURPOSE Maintain all records from the Engineering Division and Development Review Team by scanning all incoming and outgoing correspondence and maintaining filing system; Prepare and execute sewer, water and storm drain main extension agreements, fire line petitions, easements, stock agreements, new service work orders, and issue sewer, water and storm water digging permits, storm water discharge permits and collect fees. Coordinate private and public requests for connections of sewer, water and storm drain by scheduling surveys, inspections and wyes for City/construction crews. Assign and monitor progress of plan review by the Development Review team. Answer questions from various individuals, including public and private entities, about utility service, design requirements, City agreement requirements, stock certificates, City ordinances, plan review, billing and maintenance of services.

<u>BASE PURPOSE STATEMENTS</u> Efficiently maintain Department records by reducing file content duplication; ensure plans are approved and all agreements/easements are executed in a timely manner. Collect fees prior to releasing approved plans and issuing appropriate permits; provide inspectors with accurate plans and timely inspection. Provide timely and accurate answers to customer's questions.

PROGRAM:

Conservation

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

Water Conservation Master Plan, State Division of Water Resources, Utah code 73-10-32

STATEMENT OF PURPOSE

The primary purpose of SLCDPU's water conservation program is to promote the efficient and responsible use of all water resources.

BASE PURPOSE STATEMENTS

Conservation programs are grouped in the broader customer categories of municipal/public; industrial/commercial; and residential. Programs in these categories may include, but are not limited to: community/association meetings and workshops; audits and recommendations; brochures and other media; demonstration materials including videos and gardens; regulations/policy/ordinance recommendations; pricing structure and billing information; public outreach including radio and television; research. Many program components occur in partnership with other governmental/university/corporate/association partnerships. Frequently act as subject expert for other communities/agencies/associations.

Utah Occupational Safety and Health Act Title 34A Chapter 06 Utah Occupational Safety and Health Act Standard Title R614 Labor commission Occupational Safety and Health & 29CFR 1910 & 1926

STATEMENT OF PURPOSE

To plan, develop, implement and monitor department safety and worker's compensation programs. Serve as a technical resource to administrators and managers for the administration of the department-wide occupational safety, industrial hygiene, emergency preparedness, and worker compensation programs. Assist management and employees to ensure compliance with all state and federal standards. Establish guidelines and procedures intended to reduce the department's exposure to losses from safety violations and worker's compensation claims.

BASE PURPOSE STATEMENTS

Develops and assists management in the implementation of safety program.

Develops and coordinates programs to promote workplace safety. Trains, inspects and works with various work groups to prevent accidents and investigate their occurrence.

Develops work procedures and guidelines for safe operations. Ensures that the worksite complies with OSHA regulations, and that workplace practices and procedures are evaluated and modified to reduce or eliminate injuries and hazards.

Coordinates the department's Workers' Compensation Program, and related light duty and return-to-work activities. Responds to and assists management in the investigation of all work related injuries, motor vehicle accidents, property damage, visits from Utah OSHA, and other safety and emergency-related occurrences. Compiles, analyzes and reports on safety experience, trends, statistics, costs, needs and effectiveness.

Stormwater

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc) Storm Water Ordinance 17.75.010, State Blue Stake, basic municipal function – Utility Locations

STATEMENT OF PURPOSE: Provide mapping, surveying, and locating of Public Utilities water, sewer and stormwater infrastructure. Maintain the impervious billing information for the storm water utility. Survey and map Public Utilities facilities, watershed information and water right records. Maintain Public Utility web site. Mode water system, provide GIS support for Homeland security and many special projects.

BASE PURPOSE STATEMENTS The GIS division provides mapping services for both internal and external customers. These records provide a permanent record of facility locations. The GIS division provides facility maps for water, sewer, drainage, storm water utility, water rights and many special projects in order to meet the need for an increasing demand of these services. The GIS division is also used to provide information for analysis and as a decision support tool. Provide mapping information for emergency planning (Home Land Security). Insure every division within Public Utilities is linked into the GIS system, including Billing, Customer Service, Maintenance, Distribution, Watershed, Development Review and Cross Connection Control.

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE Governed by the Utah Safe Driving Water Act, as authorized under the Federal Safe Drinking Water Act (US EPA), the Operations and Maintenance Division helps provide safe, high quality water at usable pressures within the water distribution system to all of the customers served by Salt Lake City Department of Public Utilities in an efficient manner with minimal interruption of service.

BASE PURPOSE STATEMENTS The Operations and Maintenance Division operates, maintains, repairs and replaces the City's water distribution system, providing safe and high quality water for culinary use and fire protection to all of the incorporated Salt Lake City area, Holladay City, Cottonwood Heights City, portions of Murray and Midvale and the unincorporated eastside Salt Lake County areas. Major components of this unique system include 22 wells, 2 springs, 35 water storage tanks and reservoirs with a total capacity of 101,270,000 gallons of treated water, 50 different pressure zones that are fed by wells, 29 booster pump stations, gravity or a combination of these, 1385 miles of water mainline pipe ranging from 2" to 72" in size, 91,000 service connections, 9400 fire hydrants, 16,500 mainline valves and 175 regulator stations. The division also operates and maintains 45 miles of irrigation canals and other diversion structures and devices. These canals supply Utah Lake water to irrigation users in exchange for higher quality water fed from Wasatch Front mountain streams.

<u>STATEMENT OF PURPOSE</u> Governed by the Utah Water Quality Act, as authorized under the Federal Clean Water Act (US EPA), the Operations and Maintenance Division helps provide safe and effective wastewater collections service to all of the customers served by Salt Lake City Department of Public Utilities in an efficient manner with minimal interruption of service.

<u>BASE PURPOSE STATEMENTS</u> The Operations and Maintenance Division operates, maintains repairs and replaces the City's wastewater collections system, providing safe and efficient sewer collections to all incorporated Salt Lake City area. Major components of this system include over 640 miles of collection pipe ranging from 4" to 80" in size. It also includes 13,000 manholes and over 49,000 service connections. There are 32 sewer lift stations in the collection system.

DIVISION: Engineering BUDGET / \$618,199

COST CENTER / Water REVENUE Water sales

PROGRAM: Engineeering

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE

The purpose of the Water Engineering group is to provide planning, design, and construction management for Public Utilities' approved capital improvement program (CIP). The water CIP is a set of projects that are funded to repair or replace existing old pipes and install new water pipelines and facilities through the use of local construction companies.

BASE PURPOSE STATEMENTS

- Complete the approved water CIP. The performance measures are:
 - 1. Replacement of 50,000 lineal feet (LF) of water mains per year which is about 0.8% of the system
 - 2. Keep design deficiency construction change orders < 3 % of construction cost
- Provide Engineering assistance to the operation and maintenance division of the department for all water facilities
- Provide Engineering management for five major water supply dams
- Responsible for engineering services for a water distribution system which services over 300,000 customers; three water treatment plants with capacities of 40, 45, and 18 MGD; 25 water supply wells; 26 water pump stations; 36 raw water storage reservoirs and tanks; dam safety and engineering for five department dams; and other related water facilities.

The Salt Lake City water distribution system (WDS) is very large (1,190 miles of 12" or smaller distribution lines plus 201 miles of large transmission mains for a total footage of 1,391 miles of pipe in 2008) and complicated (over fifty pressure zones). The service area covers the Salt Lake City corporate boundaries as well as the east side of the Salt Lake valley all the way to the mouth of Little Cottonwood Creek. This is an aging system (Figure 1) with corrosion and other factors that affect the competency of the water pipes. There is a continual need to repair and replace bad pipe segments and reduce our emergency break repair costs. Over the last ten years we have replaced over 90 miles of water main. (Figure 2). This needs to continue in the future.

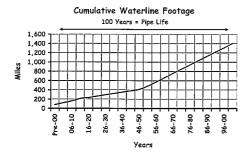

Figure 1. Pipeline Age for the Salt Lake City Water Distribution System

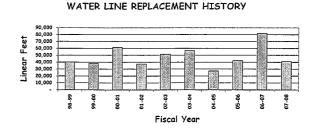

Figure 2. Water System Repair and Replacement Program

The Water Engineering group provides design and construction services for the Public Utilities capital improvements, coordinates Public Utilities water CIP program with other groups inside and outside the City (City Engineering, Salt Lake County, UDOT, etc.) and replaces approximately 1% of our local distribution pipe system annually. This replacement rate

(0.8% per year) is approximately the national average pipe replacement standard as reported by the American Water Works Association (AWWA). The 0.8% standard assumes an average pipe life of 125 years.

We have leveraged the funds allocated to repair waterlines by using new technologies. This includes pipe bursting, slip-lining the old pipes with high-density polyethylene pipe (HDPE) liners and using new, more durable pipe materials. All our designers are given special AutoCAD (computer aided design software used by the designers) training to help keep their skills in line with industry technology changes.

Sewer user fees

PROGRAM:

Engineering

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE

The purpose of the Sewer Engineering group is to provide planning, design and construction management for Public Utilities' approved capital improvement program (CIP). The sewer CIP goal is timely, cost efficient replacement of old sewer lines and control of construction change orders.

BASE PURPOSE STATEMENTS

- Complete the approved sewer CIP. The performance measures are:
 - 1. Rehabilitate 30,000 lineal feet (LF) of sewer collection mains per year using CIPP process
 - 2. Keep the design deficiency construction change orders less than 3% of the construction cost
- Provide Engineering assistance to operation and maintenance divisions of the Department for all sewer facilities
- Responsible for engineering services for a sewage collection system which serves over 150,000 customers; 50 MGD water reclamation plant; 23 sewer pump stations; and other related sewer facilities.

The sewer collection system is a very corrosive environment with hydrogen sulfide gases, sediment loads and other factors that affect the competency of the pipes. There is a continual need to repair and replace bad pipe segments. More than 50% of the sewer collection system is more than 75 years old (Figure 1).

The Sewer Engineering team provides sewer CIP planning, design and construction management services. The team must also coordinate the sewer CIP with other groups inside and outside the City (City Engineering, UDOT, etc.). The rehabilitation program is dependent on the level of funding each year but the goal is rehabilitation of at least 0.6% of our old pipe system every year (Figure 2).

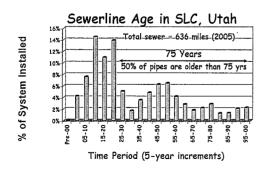

Figure 1. Pipeline Age for the Salt Lake City Sewer Collection System

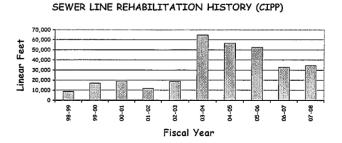

Figure 2. Sewer System Restoration Program

We are leveraging the funds allocated to repair sewer lines by using new technologies. This usually costs less than total pipe replacement and it effectively restores the pipe life. One of the new methods being used is cured-in-place-pipe liners (CIPP). This consists of a resin liner that is inserted into the old pipe and is hardened and activated by circulating hot water or steam in the pipe. When finished the resin liner is hardened and the old pipe life is restored. This can be effectively used for pipes that still have good grade. Over the last ten years over 56 miles of sewer line has been rehabilitated using CIPP methods. Another method used has been directionally boring a replacement line.

Public Utilities is trying to use the best technology to accomplish the CIP goals.

STATEMENT OF PURPOSE

The purpose of the Drainage Engineering group is to provide planning, design and construction management the approved Public Utilities' capital improvement program (CIP). The drainage CIP goal is timely, cost efficient installation of new storm water facilities and control of construction change orders.

BASE PURPOSE STATEMENTS

- Complete the approved stormwater CIP. The performance measures are:
 - 1. Installation of 10,000 LF of new storm drains per year and other Master Plan facilities as funding allows
 - 2. Change orders < 3% of construction cost
- Provide design and construction services for the Public Utilities' drainage capital improvements
- Coordinate Public Utilities capital improvement program with other groups inside and outside the City (City Engineering, Salt Lake County Flood Control, UDOT, etc.)
- Provide Engineering assistance to the operation and maintenance division of the department for all stormwater facilities
- Responsible for engineering services for a drainage system which services 110 square miles of urban watershed; flood plain management; 20 drainage pump stations; and other related drainage facilities
- Complete Master Plan projects as funding is available.
- Use the best technology available to accomplish the CIP goals.

The Drainage Master Plan was completed in 1993. The projects identified in the Master Plan will take at least another 15 years to complete. Over the last ten years almost 40 miles of storm drain pipe has been installed (Figure 1). This has included some major projects (Figure 2). These projects were funded from Stormwater Utility revenues and tax revenues

STATEMENT OF PURPOSE

The Accounting section properly records and accounts for the financial transactions of the department's three separate enterprise funds, providing a system of financial controls and producing timely information to management to assist in making informed cost effective decisions for managing the department's resources.

- 1. Complete monthly department financial reports within three working days.
- 2. Provide financials to PUAC (Public Utilities Advisory Board), by the third week of each month.
- 3. Complete external financial audit field work by October 1 annually.
- 4. Complete and have audited financial report by November 20 of each year.
- 5. Prepare and issue all documents related to our \$57 million in outstanding debt.
- 6. Complete capital project within 15 days of the end of each month.
- 7. Prepare annual \$75 million utility budgets by February 28 each fiscal year.
- 8. Prepare and complete Statistical Department Report by January 15 of each year.
- 9. Complete reconciliations and general ledger adjustments within 10 days of month end.
- 10. Record, monitor and ensure proper approval of approximately 65,000 department expenditures.

Billing

REVENUE

Water, Sewer

PROGRAM:

Department

& Stormwater

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE

To provide accurate and timely bill processing for the water, sewer, storm water, and garbage customers

BASE PURPOSE STATEMENTS

The billing section reviews and processes over 96,000 bills a month with an average revenue stream of over \$75 million per year. The billing process for Salt Lake City is a very complicated process due to 15 county exchange agreements made over the last 75 years. This and the three different water conservation rate models built into the existing rate structure makes it one of the most complicated billings systems in the industry. This section continues to revise computer programs and systems to reduce costs and processing time. One of the section goals this year is to upgrade the system to provide e-statements to our customer as will as more internet services to our customers. This section continues to provide accurate and timely bills, but this next year they propose to reduce the number of average days in the billing cycle from 3 days to 2 1/2. This will be accomplished by continuing to automate the process. This section, like meter reading, has continued to reduce staff while maintaining a high level of service.

Meter Reading

REVENUE

Water, Sewer and Storm

water

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE

Provide quality customer service through accurate and efficient data collection of field information

BASE PURPOSE STATEMENTS

The meter reading program is responsible to obtain field information from 96,000 accounts each month. It is the objective of the program is to better control the workflow in order to read 3,000 to 5,000 reads a day. This will allow other sections within the division to better handle billing and customer complaints related to the fluctuating workload. This section is also currently working on a residential meter replacement program. It is planned that 3,000 meter batteries will be replaced this year under this program. This section continues to handle an increase workload of 1% per year due to growth of the system without additional employees. This next year we will reduce the number of meter readers by one as we slowly change over to the radio reading program. The section has been able to handle this increase in growth by use of technology. Over the last five years the department has installed over 20, 000 radio equipped meters. Currently the cost to read meters by the city is below the national average of \$0.85 per read.

PROGRAM:

Service

Stormwater

AUTHORITY: (ordinance, state statute, federal regulation, basic municipal function, etc)

STATEMENT OF PURPOSE

The Customer Service section provides professional customer interaction by telephone, written correspondence (e-mail and regular mail) as well as walk-in customers. This section's account collectors collect over \$2,241,512 in delinquent revenue.

BASE PURPOSE STATEMENTS

This section provides quality customer service to over 96,000 accounts. This section has handled an increasing workload of over 700 new accounts each year over the last five years with no increase in employees. Over 103,000 customer phone calls came into the call center in 2007 and more than 8300 walk-ins were helped in person as well as 810 customers were assisted via e-mail. This section handles all the collections on delinquent accounts. A total of \$2,241,512.00 was collected from an average of 3637 customers. This section recorded 67,274 payments made through the department's internet payment service. This section also made 24,213 field visits which were initiated by customer's requests as well as the billing department.

This section continues to receive high ratings from customers based on random surveys mailed out to customers. One of the goals this next year is to reduce the number of lost calls to below 9% by training new employees and expanding our internet services. The section plans to accomplish the following goals this next year:

- 1. Respond to customer e-mails within the same business day.
- 2. Implement a QA (quality assessment) program
- 3. Reduce the number of lost calls to below 9%
- 4. Expand services to our customers by way of the internet

STATEMENT OF PURPOSE

The primary purpose of the warehouse is to control and issue materials and supplies to the Utility operation and maintenance division in a timely and efficient manner.

BASE PURPOSE STATEMENTS

The warehouse section is responsible for a \$2.2 million inventory which provides supplies, tools and equipment to the water, sewer and stormwater maintenance section. The staff is responsible to receive, count and issue all inventory items. The section is run by 4.05 employees, who try to meet the ever-changing material requirements needed to maintain and run the Utility.

Utah Pollutant Discharge Elimination System (UPDES) where all UPDES permits are in compliance with provisions of the Utah Water Quality Act, Title 19 Chapter 5, Utah Code Annotated (UCA) 1953, as amended (the "ACT"). Receiving waters classification for the "Oil Drain Canal" is "Class 3E" and "The Great Salt Lake" is "Class 5" according to Utah Administrative Code (UAC) R317-2-13. Effluent limitations on total suspended solids (TSS), biochemical oxygen demand (BOD₅), fecal and total coliforms, pH, and percent removal TSS and TBOD₅ are base on Utah Secondary Treatment Standards, UAC R317-1-3.2. Authority to require effluent bio-monitoring is provided in Permit Conditions, UAC R317-8-4.2, Permit Provisions, UAC R317-8-5.3 and Water Quality Standards, UAC R317-2-5 and R317-2-7.2. Biosolids limitations and self-monitoring requirements for metals, pathogens, vector attractions, and reporting are base on the 40 CFR 503 regulations. The storm water requirements are based on the UPDES Multi-Sector General Storm Water Discharges for Industrial Activity (MSGP). All sections of the MSGP that pertain to discharges from wastewater treatment plants have been included and sections which are redundant or do not pertain have been deleted.

- Municipal UPDES Permit No.UT0021725
- UPDES Biosolids Permit No.UTL-021725
- UPDES Multi-Sector General Storm Water Discharge Permit No.UTR000000 (MSGP)
- Industrial Pretreatment Program- established through EPA Section 307a,b of The Clean Water Act as amended by The Water Quality Act of 1987

STATEMENT OF PURPOSE

Cultivate and preserve a skilled professional and diversified staff that achieves the protection of the public health and environment through optimum performance of the City's wastewater treatment facility and effective administration of Federal Pretreatment Regulations.

BASE PURPOSE STATEMENTS

To protect public health and maintain or exceed compliance with all regulatory requirements.

- To maintain 100% compliance with plant effluent quality limits defined in our UPDES discharge permit.
- To maintain 100% compliance with the requirements of our UPDES biosolids disposal permit.
- To maintain 100% compliance with the requirements of our pretreatment program.
- Increase number of site inspections per pretreatment permit holders.
- To secure and maintain diverse and highly skill workforce capable of meeting and exceeding all requirement of the Salt Lake City Water Reclamation Facility.
